

601-10 & 601-10FW

SAFTCART[™]

The 601-10, based on the 600-10, is also intended for auto shops, power plants and other narrow environments and carries a large oxygen and medium acetylene cylinder front to back rather than the traditional side to side method. This two-tiered design ensures easy maneuverability through the tightest spots. The change is a 10" pneumatic wheel to keep it rolling in rough terrain. Also available with a firewall; just ask for the 601-10FW.

Cart Specs
