

PALLET HEADER

The PH-16T and PH-18T are pallet headers designed to easily refill high pressure cylinders, allowing you to maintain control of your cylinder program from retesting to refilling to delivery.

Purchased separately, the PH-16T attaches quickly and easily to Saf-T-Cart's STP-16, making for a quick and easy conversion. Available with a manifold (ordered separately); just specify the CGA number. Pallet headers meet the D.O.T. requirements for valve protection during transport.

PH-16T, PH-18T

Height: 55"

Width: 38"

Weight: 105 lbs.

Cylinder capacity: 16-18 ea.
